Bautista Berto, Frontend Developer

Buenos Aires, Argentina, 1157964781, bertobautista03@gmail.com

---

PROFILE

A Frontend Developer proficient in React.js, TypeScript, and Three.js, with 3+ years of experience building applications from the ground up. With a strong track record of developing and launching projects for companies and personal initiatives. Skilled in collaborating with global teams to take products from zero to one, ensuring high-quality, performant applications.

PROFESSIONAL EXPERIENCE

Dec 2022 — Jun 2024

Frontend Developer, LambdaClass

Led the frontend development of a multiplayer mobile game and multiples websites, collaborating with international teams (US & Europe) to build a high-performance, interactive experience.

Key Achievements & Responsibilities

- Feature Development & Real-Time Systems: Implemented core frontend features, including character creation, lobby management, and multiplayer synchronization, ensuring seamless real-time interactions.
- Performance Optimization: Led code refactoring and performance enhancements, reducing latency and improving load times for low-end devices, enhancing application speed and rendering efficiency.
- Collaboration with Backend Team: Maintained close coordination with the backend team, designing and coordinating feature implementation on both sides of the project, ensuring seamless integration of frontend and backend components.
- Scalable & Maintainable Code: Applied modular architecture, reusable components, TypeScript for type safety, and performance-driven rendering techniques, enhancing long-term scalability.

Tech Stack & Core Skills:

- Languages & Frameworks: JavaScript, TypeScript, React.js, C#, Unity

Jul 2022 — Mar 2024

Frontend developer, National University of Lanús

Specializing in React.js, developed a monitoring and visualization website for climatologist stations in Buenos Aires for the public organization ACUMAR.

Key Achievements & Responsibilities:

- Feature Implementation – Designed and maintained a scalable React.js codebase, ensuring optimal performance and maintainability.
- Interactive Mapping & Visualization : Built an custom interactive map for station creation and real-time monitoring dashboards, improving displaying precipitation, humidity, and other environmental data.
- Tech Stack: React.js, JavaScript, Material UI, Docker, Git, Figma

---

EDUCATION

Jan 2020 — Present

Bachelor of information systems, Universidad Nacional de Lanús
Buenos Aires

Achieved a Systems Analyst degree after four years of study. Selected to join the Research & Development department, contributing to real-world software solutions

---

SKILLS

TypeScript, React, ThreeJs, Zustand	C# / Unity
ExpressJs, NodeJs	MongoDB , MySQL
HTML5, CSS, TailwindCSS, GSAP	Strong Communication Skills

LANGUAGES

English	Highly proficient	Spanish	Native speaker

HOBBIES

I enjoy collecting random vinyl records, playing board games, lifting heavy at the gym, and traveling.
